DATE

On the evening of Sunday, Dec 14, 1958 I was taking photographs of my family on the front lawn of our home about 7pm. A light snow had stopped falling a hour or so before. It was cloudy; there was no stars or moon visible. I had taken two fotos and was preparing to take a third when I observed this glowing ball of light to the east. Using the scope of the camera for a better view, it suddenly dawned on me to snap the shutter thus resulting in the picture i already forwarded to the air force. The object looked like a small moon (Our moon, had it been visable wuld have been in the north). It was stationary, sort of hovering in the sky, and then after about ten seconds seemed to fade away without ever changing position

The following diagram fairly represents my position and the position of the object:

Gentlemen.

The attached photo was taken by me with a polaroid camera on the evening of 12-14-58 between 7 & 8 PM. A strange & unexplained light appeared over the house. I was facing east when I snapped the picture. After reading in the papers of strange lights in the sky this past weekend I thought this picture may be of some value in your investigation.

Very truly yours
